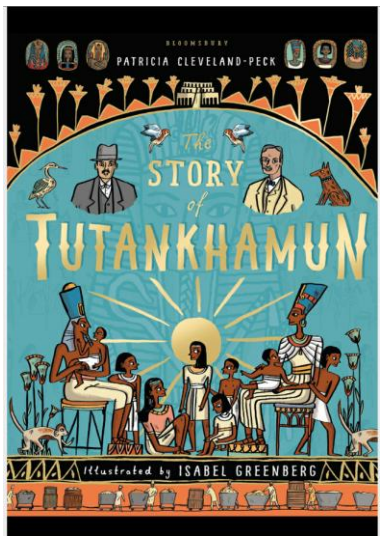
Our class texts...



Key Learning this term...

This half term we will be learning about the Ancient Egyptians – a sometimes grisly topic that is always fascinating – and we will be basing much of our writing around this as well as our history learning and art and design technology.

In maths we are currently finishing off units on mass, capacity and decimals. Once these are completed, we'll be moving on to learn about time, angles, money and statistics.

In science we are learning about light. We will be finding out about different types of light sources, investigating shadows and learning how to stay safe in the sun.

Our computing lessons will focus on desktop publishing, in RE we will be revisiting the Christian creation story and key religious events and in PSHE we will be thinking about rights and responsibilities.

More details of everything we will be learning about can be found on the curriculum pages of our school website.

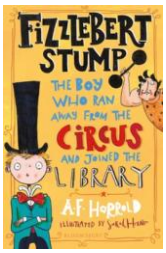
Vision and values

Our value this half term is 'friendship' and we will be exploring this through collective worship and our PSHE lessons. We are continuing to hold regular 'circle time' sessions as part of these lessons to give children the chance to explore and express their feelings.

Reminders...

With the weather (hopefully) improving, we'll be making more use of the field in our PE lessons so please make sure children have PE kits in school. These should stay in school all half term and will be sent home for a wash before the next holiday. In warmer weather, children should also bring a hat to school. Suncream should, ideally, be applied at home before school. Also jewelry should not be worn to school. The only permitted items are stud earrings if ears are pierced and a watch.

Recommended Read!



AF Harrold's quirky story about a circus boy who is fascinated by his local library is funny, charming and packed full of action. There are also a selection of sequels if this one goes down well.
